APL Tripod Datasheet

The APL tripod is intended to be used for the lifting and lowering of equipment and personnel or as an anchor point for fall arrest for the prevention of falls. For personnel protection the tripod must be used in conjunction with fall arrest equipment.

The APL Tripod complies with EN 795: 2012 (Type B) for attachment of 1 user and with CEN/TS 16415: 2013 (Type B) for the protection of up to 6 persons simultaneously.

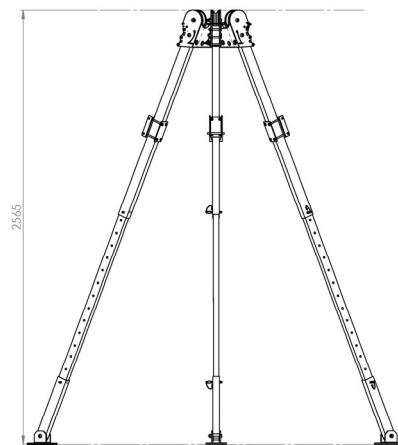

The APL Tripod has multiple adjustment points and has a fully extended height of 2.56m making it ideal for many applications.

The APL Tripod can also be used for lifting goods to a maximum capacity of 750kg but this should never be done whilst people are in suspension.

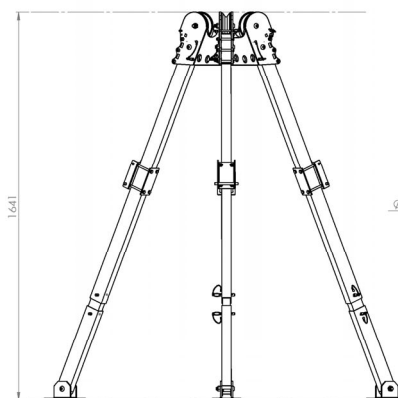

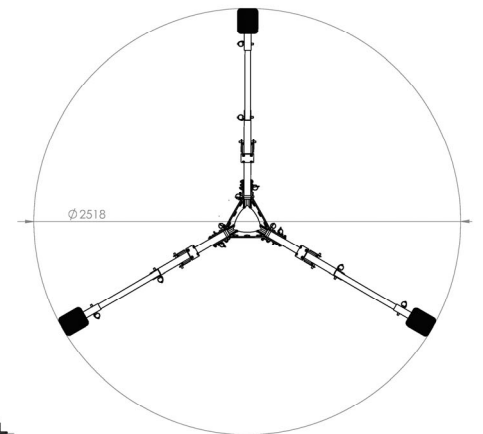

- 14 Adjustment Heights: 1641mm to 2565mm
- Aluminium construction with steel winch brackets and nylon pulleys
- Product weight: 24.5 kgs
- Rated for 6 persons (maximum 150kg per person) and 750kg for goods
